

24-25 February 2016

AAPG

Reality-Based Reservoir Development: New Teams, Techniques, Technologies

Midland Country Club, Midland, Texas

Co-Hosted by: West Texas Geological Society (WTGS)

Two Day Event

What are the geological realities that engineers need to know?

What are the engineering realities that geologists need to know?

Building on the success of the Oklahoma City AAPG-SPE joint program on "Reality Based Reservoir Development," the WTGS and AAPG are teaming up to create a workshop that brings together engineers and geologists to give each other new insight and to formulate solutions.

With the recent surge in new techniques and technology, as well as new plays put into production, a tremendous opportunity exists in both U.S. and international reservoirs to apply lessons learned to existing reservoirs in order to economically increase production and recoverable reserves.
